- Implemented JWT based authorization.
- Writing validation for each API.
- Writing API followed by HATEOS with proper status code.
- Designed UI screens using Angular-10 and Raul-3 for AIRM product follow by InVision mock screen.
- Prepared TDD, ER Diagram, Flow Diagram and UML Diagram of existing for each functionality and attached to Jira.
- Writing the business logic followed by Approved TDD/Flow Diagram document.
- Writing unit test cases using power mock and Junit.
- Prepared Architecture Design Document with complete details along with server configuration.
- Utilized safe agile process to streamline development process.
- Individual contributor for jasper reports module in AIRM.
- Closely Working with the business on day-to-day basis for completion of tasks.
- Code verification with co-developer to make sure that we follow proper coding standards.
- Working with the Production Engineers for Production deployments.
- Participating in the team meetings and business requirements gathering sessions.

DEV III – Full Stack Java Developer

**Notification-System (Develop from Scratch)** (Java-8, Spring Boot, Spring JPA, Spring JDBC, Angular, Postgres)

- Getting information from the business and Technical folks and giving the story estimation.
- Dividing the work among the team member based on the area.
- Resolving the dependency related to dev work to complete the functionality smoothly.
- Build new microservices architecture for Notification-System along with Solution Architecture.
- Setup ELK Stack log analyzer in production and lower environment to verify error logs.
- Implemented JWT based authorization.
- Writing validation for each API.
- Writing API followed by HATEOS with proper response code.
- Designed UI screens using Angular-8 and Raul-3(RealPage UI Components) for AIRM product follow by InVision mock screen.
- Prepared TDD, ER Diagram, Flow Diagram and UML Diagram of existing for each functionality and attached to Jira.
- Writing the business logic followed by Approved TDD/Flow Diagram document.
- Writing unit test cases using power mock and Junit.
- Prepared Architecture Design Document with complete details along with server configuration.
- Utilized safe agile process to streamline development process.
- Individual contributor for jasper reports module in AIRM.
- Closely Working with the business on day-to-day basis for completion of tasks.
- Code verification with co-developer to make sure that we follow proper coding standards.
- Working with the Production Engineers for Production deployments.
- Participating in the team meetings and business requirements gathering sessions.

*DEV II – Full Stack Java Developer*

**Money-In, Money-Out, Dashboard Module (Version 2)** (*Java-8, Spring Boot, Spring JPA, Spring JDBC, Angular*)

- Migrated Monolithic application PW to Microservice architecture (PW2)
- Integrate ELK Stack for log analyzer in production and lower environment.
- Implemented JWT based integration for authorization.
- Prepared TDD, ER Diagram, Flow Diagram and UML Diagram of existing functionality for each and attached to Jira.
- Prepared Architecture Design Document of Microservice.
- Utilized safe agile process to streamline development process.
- Closely Working with the business on day-to-day basis for completion of stories.
- Code verification with co-developer to make sure that we follow proper coding standards.
- Working on data patch and PME issues.
- Participating in the team meetings and business requirements gathering sessions
- Write unit test cases using power mock and Junit.

**ValueLabs Private Ltd**, Hyderabad, India

(*Sep 2015 – Feb 2017*)

*SR Software Egg – Full Stack Java Developer*

**Enrollment, Carrier, HR and Member Module** (*Java, Spring, Hibernate, Struts-1 and Oracle PL/SQL*)

- Designed UI screens using Struts-1 followed by Mock Screen.
- Prepared TDD and Flow Diagram and attached to Rally.
- Implementing the functionality or writing the business logic as per TDD document.
- Write unit test cases using power mock and Junit.
- Utilized agile process to streamline development process.
- Closely Working with the business on day-to-day basis for completion of task.
- Code verification with co-developer to make sure that we follow proper coding standards.
- Participating in the team meetings and business requirements gathering sessions

**SourceOne Management Service Pvt. Ltd.**, Bangalore, India

(*Mar 2014- Sap 2015*)

*SR. Software Egg – Full Stack Java Developer*

**Job Module** (*Java, Spring, Hibernate, Hive, HBase, Solr, Liferay, Jsoup*)

- Gathering the information from business and Technical folks.
- Created the functional and technical document and get it approved from the business.
- Design Portlet for job search followed by Mock Screen.
- Written the logic to Crawl the jobs from different sites and consume restful service and dump into Hive.
- Solr integrated with Hive to apply the JD search.
- Closely Working with the business on day-to-day basis for completion of task.
- Code verification with co-developer to make sure that we follow proper coding standards.

*Software Egg – Full Stack Java Developer*

**Resume Parser** (*Java, JavaFX, MySQL, Hibernate, Threading*)

- Gathering the information from business and Technical folks.
- Creating the functional and technical document and get it approved from the business.
- Writing Regular expression to parse different attribute from resume.
- Using Java File library to read the valid resume from the system and applied the regex and pull the information and dump into DB.
- Apply threading to improve performance.
- Design UI interface in JavaFX to get the student detail based on keyword.
- Closely Working with the business on day-to-day basis for completion of task.
- Code verification with co-developer to make sure that we follow proper coding standards.

HCL Infosystem Pvt. Ltd., Noida, India

(July 2011- Mar 2013)

Associate Software Egg – Java & SQL Developer

**CRM (Java, Spring, Hibernate, MySQL, Struts-1)**

- Writing DB function and procedure to follow methodology document.
- Writing the business logic and unit test cases to achieve the functionality.
- Design the UI screen followed by mock screen.
- Closely Working with the business on day-to-day basis for completion of task.
- Participating in the team meetings and business requirements gathering sessions
